- The pituitary gland regulates and controls other endocrine glands and so is called as the "Master gland".
- The hormones secreted by the thyroid gland are triiodothyronine (T_3), and tetraiodothyronine or thyroxine (T_4)
- The parathormone act on bone, kidney and intestine to maintain blood calcium levels.
- Pancreas secretes insulin and glucagon. They maintain blood glucose level.
- Adrenal cortex secrete coritsol and aldosterone and adrenal medulla secretes epinephrine and norepinephrine.
- The sex glands are of two types the testes and the ovaries which secrete testosterone and estrogens respectively.

TEXTBOOK EVALUATION

KG94U

I Choose the correct answer

1. Gibberellins cause:
   a) Shortening of genetically tall plants
   b) Elongation of dwarf plants
   c) Promotion of rooting
   d) Yellowing of young leaves
2. The hormone which has positive effect on apical dominance is:
   a) Cytokinin b) Auxin
   c) Gibberellin d) Ethylene
3. Which one of the following hormones is naturally not found in plants:
   a) 2, 4-D b) GA3
   c) Gibberellin d) IAA
4. Avena coleoptile test was conducted by
   a) Darwin b) N. Smit
   c) Paal d) F.W. Went
5. LH is secreted by
   a) Adrenal gland b) Thyroid gland
   c) Anterior pituitary d) Hypothalamus.
6. Identify the exocrine gland
   a) Pituitary gland b) Adrenal gland
   c) Salivary gland d) Thyroid gland
7. Which organ acts as both exocrine gland as well as endocrine gland
   a) Pancreas b) Kidney c) Liver d) Lungs
8. Which one is referred as "Master Gland"?
   a) Pineal gland b) Pituitary gland
   c) Thyroid gland d) Adrenal gland

II Fill in the blanks

1. _____ causes cell elongation, apical dominance and prevents abscission.
2. _____ is a gaseous hormone involved in abscission of organs and acceleration of fruit ripening.
3. _____ causes stomatal closure.
4. Gibberellins induce stem elongation in _____ plants.
5. The hormone which has negative effect on apical dominance is _____.
6. Calcium metabolism of the body is controlled by _____.
7. In the islets of Langerhans, beta cells secrete _____.
8. The growth and functions of thyroid gland is controlled by _____.
9. Decreased secretion of thyroid hormones in the children leads to _____.
