11. OBSERVATION OF TRANSVERSE SECTION OF DICOT STEM AND DICOT ROOT

Aim:

To observe transverse section (T.S) of Dicot Stem / Dicot Root from permanent slides.

Observation:

A. The given slide is identified as T.S of Dicot Stem

Reasons

(i) Vascular bundles are arranged in a ring.

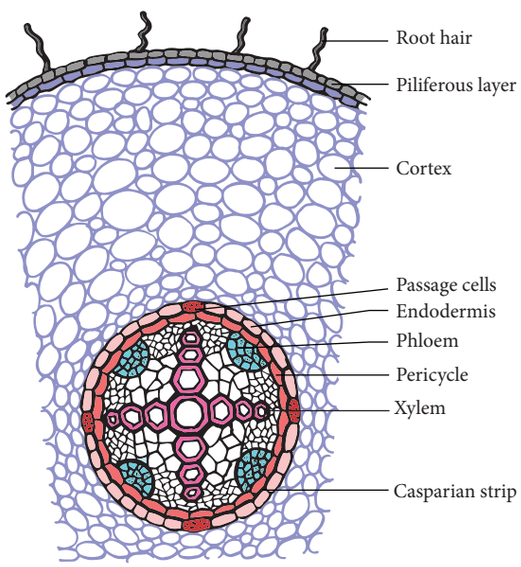

(ii) Conjoint, collateral, endarch and open vascular bundle.

(iii) Ground tissued differentiated into cortex, endodermis, pericycle and pith.

(iv) 3 to 6 layer of collenchymas tissues present in hypodermis.

Observation:

B. The given slide is identified as T.S of Dicot Root

Reasons

(i) Vascular bundle are radial

(ii) Xylem is exarch and Tetrarch

(iii) Casparian strips and passage cells are present in endodermis

(iv) Cortex is made up of parenchymatous cells
