The factors that bolster co-operation among members

First, the common need among developing countries to construct an economic order that reflects the current situation will drive the BRICS efforts. In this matter, the idea of NDB and CRA are defining changes and will have huge geo-economic and geopolitical impact.

Second, the BRICS alternative idea in the landscape of global governance will attract support from other countries.

Third, the expansion of BRICS interaction to other sector will make it more strong partnership.

OPEC

OPEC, the Organisation of the Petroleum Exporting Countries (a group of oil-producing nations), is an intergovernmental organisation founded in Baghdad, Iraq, and headquartered in Vienna, Austria. Iran, Iraq, Kuwait, Saudi Arabia and Venezuela are the OPEC's Founder Members.

There are three categories of memberships: Founder Members, Full Members and Associate Members. OPEC membership is open to any country that exports crude oil and which shares the ideals of the organisation.

OPEC's mission

- To coordinate oil policies in its member countries
- Help stabilise oil markets
- To secure fair and stable income to petroleum producers
- An efficient, economic and regular supply of oil to consuming nations
- A fair return on capital to those investing in the petroleum industry

How does OPEC help other countries?

The OPEC Fund for International Development (OPID) is an institution that helps finance projects with low interest loans. It also provides grants to social and humanitarian projects.

The OPEC LOGO

It is the result of an international design competition held in 1969. An Austrian designer Svoboda won the competition with her design, which combined the different letters of the organisation's name in a rounded design.

OPEC has an Information Centre with over 20,000 volumes including books, reports, maps and conference proceedings related to petroleum, energy and the oil market. The Information Centre is open to the public and is often used by researchers and students.

India's relationship with OPEC

India is one of the biggest consumers of crude oil. OPEC obviously has vested interest in India's economic growth. We import 86% of crude oil, 70% natural gas, 95% of cooking gas from OPEC countries. India has been identified as a great partner for OPEC mainly because of its high oil demand.

India doesn't have enough oil reserves. India can't produce oil. Devoid of necessary oil reserves India strongly focuses on agriculture, and industrial production.

Conclusion

Apart from economic and trade cooperation, India also aspires to have a warm relationship with its neighbours and extended neighbours in the field of education, health, fighting terrorism, disaster management, employment for its citizens, curbing organised crimes, technology development and so on.
