(ii)	$0 < \theta < 90°$	The line has positive slope (A line with positive slope rises from left to right).	 Fig. 5.18(b)
(iii)	$90° < \theta < 180°$	The line has negative slope (A line with negative slope falls from left to right).	 Fig. 5.18(c)
(iv)	$\theta = 180°$	The line is parallel to the negative direction of X axis.	 Fig. 5.18(d)
(v)	$\theta = 90°$	The slope is undefined.	 Fig. 5.18(e)

Activity 3

The diagram contain four lines l_1, l_2, l_3 and l_4.

(i) Which lines have positive slope?

(ii) Which lines have negative slope?
